County Saves \$99,000 by Rebuilding Grader

Woodbine, Ga. (June 12, 2013) – The Camden County Board of Commissioners authorized the County Road Department to have the oldest Caterpillar 140G Motor Grader rebuilt, saving the County more than \$99,000. To purchase a new grader would have cost the County \$243,037.00

The Camden County Road Division currently has 6 road graders used for maintenance on unimproved roads and for construction of improved roads. Due to reliability and age only 5 graders are used on a daily basis. The Road Division proposed having the oldest Caterpillar 140G Motor Grader rebuilt to increase reliability and usage so with preventive maintenance and refurbishing the 1989 model would extend the life cycle of the heavy equipment by one cycle. The Road Division turned to Yancey Brothers for the Rebuild. Yancey Brothers Company Used Equipment Rebuild Center performs Cat Certified Rebuilds, Certified Powertrain Plus Rebuilds and General Reconditioning on machines that are purchased with the intent of rebuilding and offering to customers as an option alongside new and used equipment. Technicians working in the Rebuild Center average twenty years of experience in the industry and take great pride in the products they are building for Yancey customers.

“This is a great example of searching for better ways of doing County business which results in cost savings to the tax payers” said, County Administrator, Steve Howard.
